

Nimrod

design **Marc Newson** / 2009

The development of Nimrod low chair was the fruit of many years of research that eventually led to the definitive product, which has been on the market since 2009. Magis' initial objective was to produce this piece using blow-moulding technology, but after countless attempts to achieve the level of technical quality the company has always demanded, this quest was abandoned in favour of rotational moulding, which provided a better aesthetic definition of the chair.

materials /

shell in polyethylene. Cushions in expanded polyurethane (class 1 IM) covered in fabric.

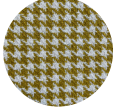

colours /

structure / white 1735 C

cushions /
