

# Tubby

design **Marc Newson** / 2012

The unmistakable hand of Marc Newson is immediately recognizable in the playful approach to this design, combined with great attention to quality, in the creation of the distinctive Tubby planters. With four different models, all made of rotational-moulded polyethylene, Tubby is extremely versatile, and can be used as a plant pot or cachepot, suitable for indoor or outdoor use, in both domestic and contract settings.

## material /

in polyethylene. On wheels (except height 100).
