

# MAGIS

Vigna by Martino Gamper

# Martino Gamper

## Profile:

Martino Gamper (born in 1971 in Merano, Italy) lives and works in London. Starting as an apprentice with a furniture maker in Merano, Gamper went on to study sculpture under Michelangelo Pistoletto at the Academy of Fine Arts, Vienna. He completed a Master in 2000 from the Royal College of Art, London, where he studied under Ron Arad.

Working in both design and art venues, Martino Gamper engages in a variety of projects from exhibition design, inte-

rior design, one-off commissions and the design of mass-produced products for the cutting edge of the international furniture industry, such as Magis. Gamper has presented his works and projects internationally in many selected exhibitions, and he was also the recipient of the Moroso Award for Contemporary Art in 2011 and of the Brit Insurance Designs of the Year Furniture Award in 2008 for his project '100 Chairs in 100 Days'.

# Design and

The steel rod chair Vigna for Magis is Martino Gamper's first industrial design. Like a climbing plant, the swirl of twisting rod creates a structural feature support the chair leg as well as being a decorative element. The seat is in bi-injection-moulded plastic, a technology that offers the possibility to obtain a seat in numerous two-tone colour combinations. Alongside the chair, we also developed the design for a number of tables: a round table with a central column of twisted steel rods, and one square four-legged table with the same climbing swirl feature seen on the chair legs.

# Engineering

“ The structure in steel rod painted in polyester powder resembles

the branches of a climbing plant that support the seat ”

# Information

# Product

## Chair

The frame is in steel rod, cataphoretically treated and painted in polyester powder. The seat is in bi-injection moulded polypropylene. Vigna is available in 4 different colours, is stackable up to 3 pieces and is suitable for outdoor use.

## Tables

The frame is in steel rod, cataphoretically treated and painted in polyester powder. The top is in Werzalit. Suitable for outdoor use.

## PRODUCT CARE

We recommend using a soft rag, either dry or wet. When needed, use ph-balanced soap diluted in water. Do not use abrasive sponges as they may leave scratches. Avoid using acidic products, solvents and products containing ammonia. Periodic and correct maintenance allows the product to keep its original aspect and lengthens the duration of its performance.

## WARNING

Do not use different cleaning products from the ones mentioned above. Do not use the product in an improper way. Do not place hot objects on it, stand on it or use the product as a ladder. Once disused, please make sure that this product is disposed in an environment-friendly way.
